BCS Certificate in Computer Science Teaching

Do you teach Computing?
This Certificate could be for you!

Computing At School (CAS), part of BCS, The Chartered Institute for IT, have developed a certificate for Computing teachers offering professional recognition of both their subject knowledge and pedagogical understanding around Computing, in particular the computer science element.

The Certificate will accredit:
- your technical skills, demonstrated by a programming project
- your pedagogical understanding and reflective practice by completion of a classroom investigation
- your commitment to your own professional development through engagement with local CPD events (e.g. training delivered by CAS Master Teachers and attendance at CAS Hubs)

"I learned a lot from developing my programming skills as I prepared for the certificate and it also gave me an insight into how students will need to prepare for the OCR Controlled Assessment."
L. Rowe, secondary teacher

"The course has been excellent and I would recommend any ICT teacher to apply. Having completed the certificate I now feel more confident to deliver the new primary computing curriculum."
M. Wimpenny-Smith, primary teacher

Once enrolled you have one year to complete your evidence.
